### Item 1 Depot Property

Moving ahead with capital project planning. Maximum \$19 million-dollar cost.

Focus will be on MS/HS. A tour for the committee was held and there are definite areas pinpointed that need work.

We need to figure out what qualifies for state aide and what does not.

December 2020 vote? December 2021 vote? Given our current status a decision will need to be made.

We reviewed the potential capital project line by line with Steve. Questions were asked on different areas.

Current plan has a \$25 million price tag that will need to be reduced and administration will take a look at what can be cut.

Lastly – figure out what qualifies for aide, design timeframe potentially 2021-22 with construction beginning in 2022-23. Go back to document and narrow down project and costs.

Beth was providing a document from attorney for us to read on the Depot property. A decision will need to be made – move forward or not with potential acquisition.

Next buildings and grounds meeting will take place in approximately two weeks.
